

PROPPER®

SINCE 1967

PROPPER®

We got our start in 1967 with a contract for the U.S. Navy, manufacturing the iconic “Dixie Cup” hat worn by U.S. sailors. Over the decades since, we’ve supplied more garments to the U.S. Department of Defense than any other manufacturer, and built a commercial brand of product for law enforcement agencies and the greater public safety community.

Our heritage informs how we operate. We don’t believe in gimmicks or marketing ploys. We focus on quality, features, and value because that is what wins contracts.

We also believe loyalty is earned through experience. You may not have tried us before, but once you do, you will see what we mean.

AUTHENTIC

No flashy logos. No unnecessary detail. Just good people making good gear defined by precision, quality and value.

RESPONSIVE

Experiencing is believing. Give our products a try. If you’re not satisfied with your gear, we’ll take it back within 30 days, hassle free.

PROVEN

Don’t just take our word for it. As the leader in first responder and military apparel, we’ve supplied millions with garments that stand the tests of time.

PRODUCT COLOR / FABRIC MATCH

Over the last several years, Propper has worked with countless law enforcement agencies and suppliers to develop products that meet their exacting needs. During these collaborations, Propper developed our legendary Battle Rip 65% polyester / 35% cotton fabric with BDU pants and shirts at its core.

Over time, the tactical market evolved, which lead adding new product with updated color standards and designs. The following tables seeks to identify products and colors that have been designed to be worn together and reduce potential confusion that these two distinct families sometimes cause.

BDU 2.0

Classic Features, Modern Upgrades

Original BDUs have been an enthusiast favorite for decades, so we knew it was important not to lose sight of the heritage that made them so popular.

The BDU 2.0 is an iteration on the original MIL-T-44047E spec with a few modern upgrades focused on utility, durability, and ergonomics.
